PROFILE SUMMARY

Microsoft Certified Power BI Data Analyst (PL-300) with 6+ years designing scalable BI solutions using Power BI, DAX, Power Query, SQL Server, Azure SQL Database, Azure Data Factory (ADF) and ETL. Skilled in Star Schema/Snowflake Schema data modeling, Row-Level Security, Query Folding, and Incremental Refresh to deliver high-performance dashboards via Power BI Service.

TECHNICAL SKILLS

- BI & Visualization:** Power BI Desktop, Power BI Service, Excel.
- Cloud & Data Engineering:** Azure SQL Database, Azure Data Factory (ADF), Azure Synapse Analytics
- Data Modeling:** Star Schema, Snowflake Schema, Dimensional Modeling
- Languages:** DAX, SQL
- Data Preparation:** Power Query (M), ETL
- Performance Optimization:** Query Folding, Incremental Refresh, Report Optimization, DAX Optimization
- Security:** Row-Level Security (RLS)
- Databases:** SQL Server, MySQL, PostgreSQL, Azure SQL Database
- Version Control:** Git
- Methodologies:** Agile, Scrum
- Domain Expertise:** eCommerce, Retail, Supply Chain & Logistics, Healthcare, BFSI

PROFESSIONAL EXPERIENCE

Senior Software Engineer (PowerBi) Canary Techsys, Pune	<i>Oct 2024 – Present</i>
- Designed, developed, and delivered 30+ interactive Power BI dashboards and reports for clients across Retail & eCommerce domains. - Extracted, transformed, and loaded data from SQL Server and Azure SQL Database using Power Query, ETL processes, and Azure Data Factory (ADF) for business reporting. - Built and maintained ADF pipelines to automate data ingestion, transformation, and movement between source systems and reporting layers. - Developed DAX measures, calculated columns, KPIs, and business metrics to support data-driven decision-making. - Built optimized data models using Star Schema and Snowflake Schema and improved report performance through DAX optimization, Query Folding, and Incremental Refresh. - Published and managed reports in Power BI Service and implemented Row-Level Security (RLS) for secure data access. - Gathered business requirements and delivered scalable Power BI and Azure-based analytics solutions that enabled actionable business insights.	
Software Engineer (Data Analyst) Growder Technovations Pvt. Ltd., Surat	<i>Apr 2023 – Oct 2024</i>
- Designed, developed, and maintained 25+ interactive Power BI dashboards for eCommerce analytics, covering sales, customers, orders, inventory, revenue, and operational KPIs. - Improved dashboard performance by 45% through optimized Star Schema and Snowflake Schema data models, DAX optimization, Query Folding, and Incremental Refresh. - Reduced report refresh time by 55% by optimizing ETL workflows using Power Query and SQL Server, ensuring faster and more reliable data refresh.	

- Performed ETL processes using Power Query and SQL Server to extract, transform, and integrate data from multiple data sources.
- Developed SQL Server stored procedures, functions, triggers, and complex SQL queries to support reporting and backend data processing.
- Implemented Row-Level Security (RLS), Query Folding, and Incremental Refresh to enhance report security, scalability, and performance.

Power BI Developer | Infinite Tech Solution, Pune

Jan 2020 – Apr 2023

- Designed, developed, and delivered 30+ interactive Power BI dashboards and reports to support business intelligence, operational reporting, and KPI tracking.
- Improved dashboard performance by 40% through DAX optimization, Query Folding, and optimized Star Schema/Snowflake Schema data models.
- Reduced report refresh time by 60% by optimizing ETL workflows using Power Query and SQL Server.
- Developed advanced DAX measures, calculated columns, KPIs, and business metrics to support data-driven decision-making.
- Implemented Row-Level Security (RLS), Query Folding, and optimized data models to enhance report security, scalability, and performance.
- Published and managed reports in Power BI Service with scheduled refreshes, supporting 100+ business users through secure self-service analytics.
- Collaborated with business stakeholders in an Agile/Scrum environment and used Git for version control while delivering scalable BI solutions.

CERTIFICATION

- Microsoft Certified: Power BI Data Analyst Associate (PL-300)

EDUCATION

- Master of Computer Application (MCA) | KBC North Maharashtra University, Jalgaon
- Bachelor of Computer Application (BCA) | KBC North Maharashtra University, Jalgaon

PROJECTS

1. PASS – B2B eCommerce Marketplace

Domain: Retail & eCommerce

Technologies: Power BI, Power BI Service, DAX, Power Query (M), SQL Server, Azure SQL Database, Azure Data Factory (ADF)

- Designed and developed interactive Power BI dashboards to analyze sales, orders, inventory, customer behavior, and business KPIs.
- Built ETL pipelines using Azure Data Factory (ADF) and integrated data from SQL Server and Azure SQL Database using Power Query.
- Developed advanced DAX measures, calculated columns, and KPIs to support business reporting and data-driven decision-making.
- Built optimized Star Schema data models and improved report performance using Query Folding, DAX optimization, and Incremental Refresh.
- Implemented Row-Level Security (RLS) and published reports to Power BI Service with scheduled data refresh.
- Collaborated with business stakeholders to gather reporting requirements and deliver scalable business intelligence solutions.

2. Inpackaging – Supply Chain and Logistics Analytics

Domain: Supply Chain & Logistics

Technologies: Power BI, DAX, Power Query, SQL Server

- Designed and developed interactive Power BI dashboards to monitor inventory, procurement, warehouse operations, order fulfillment, logistics performance, and operational KPIs.

- Extracted, transformed, and integrated data from SQL Server using Power Query and ETL processes to support reporting and analytics.
- Developed advanced DAX measures, calculated columns, and KPIs to analyze inventory movement, supplier performance, and operational efficiency.
- Built optimized Star Schema data models and improved report performance using Query Folding, DAX optimization, and Incremental Refresh.
- Implemented Row-Level Security (RLS) and published reports to Power BI Service with scheduled data refresh.
- Collaborated with business stakeholders to gather reporting requirements and deliver data-driven supply chain and logistics insights.

3. Healthcare Analytics – Patient Management System

Domain: Healthcare

Technologies: Power BI, DAX, Power Query, SQL Server

- Designed and developed interactive Power BI dashboards to analyze patient, clinical, and operational KPIs, enabling data-driven healthcare decisions.
- Extracted, transformed, and integrated data from SQL Server using Power Query and ETL processes for accurate and reliable reporting.
- Developed advanced DAX measures, calculated columns, and KPIs to monitor patient outcomes, hospital performance, and operational efficiency.
- Built optimized Star Schema data models and improved report performance using Query Folding, DAX optimization, and Incremental Refresh.
- Implemented Row-Level Security (RLS) to provide secure, role-based access to sensitive healthcare data.
- Published and managed reports in Power BI Service with scheduled data refresh, delivering timely insights to healthcare stakeholders.

4. Financial Performance & Revenue Analytics Dashboard

Domain: Finance

Technologies: Power BI, DAX, Power Query, PostgreSQL

- Designed and developed interactive Power BI dashboards to analyze financial KPIs, including revenue, expenses, profit margins, budget variance, cash flow, and financial performance.
- Extracted, transformed, and integrated data from PostgreSQL using Power Query and ETL processes to deliver accurate and reliable financial reporting.
- Developed advanced DAX measures, calculated columns, and KPIs to monitor profitability, revenue trends, budget utilization, and Month-over-Month (MoM) and Year-over-Year (YoY) growth.
- Built optimized Star Schema data models and improved report performance using Query Folding, DAX optimization, and Incremental Refresh.
- Implemented Row-Level Security (RLS) to provide secure, role-based access to sensitive financial data.
- Published and managed reports in Power BI Service with scheduled data refresh, enabling finance teams to make data-driven decisions.
